

Historical vs projected 2100 genetic diversity (SSP5-8.5 per-GCM ensemble)

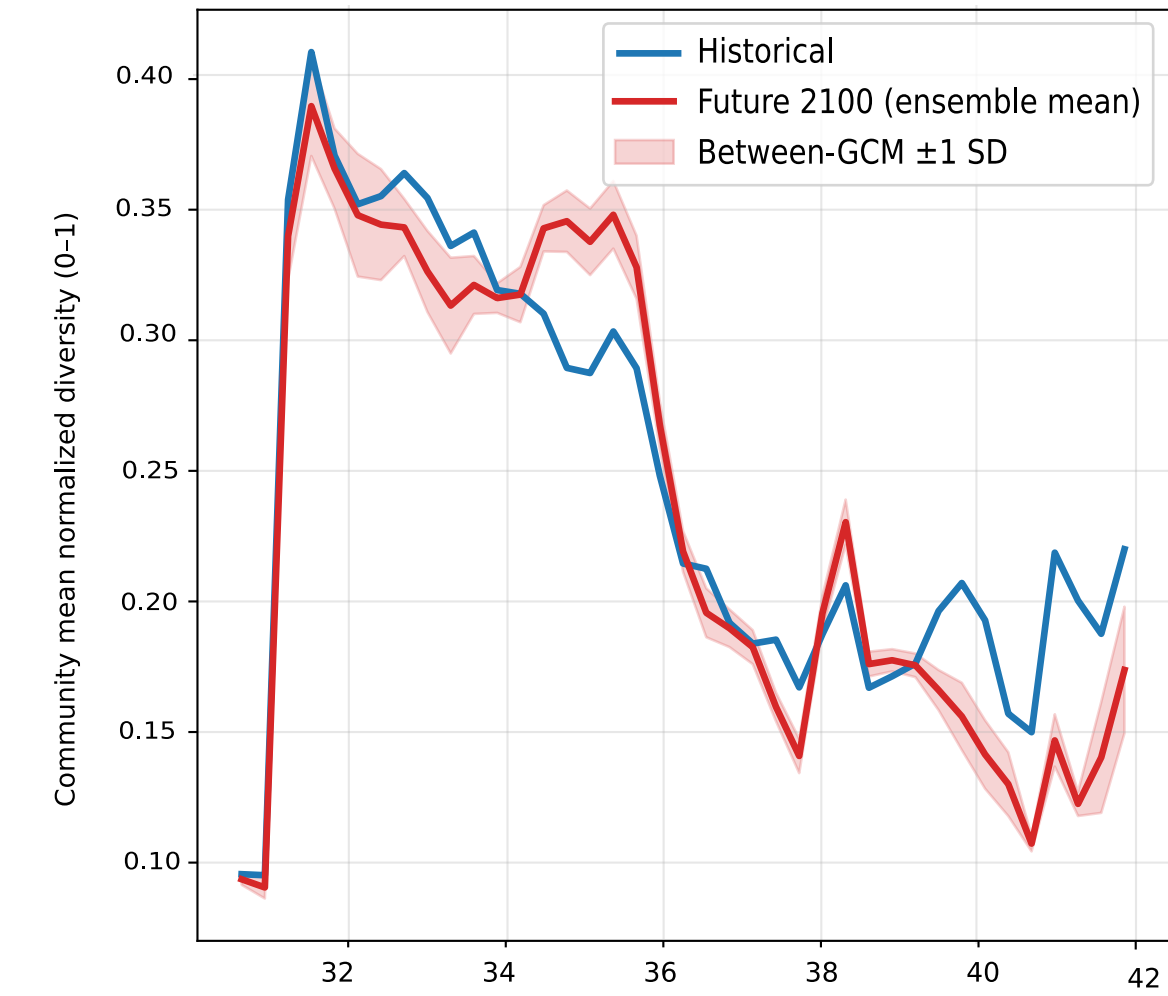

a) Species-level change — He

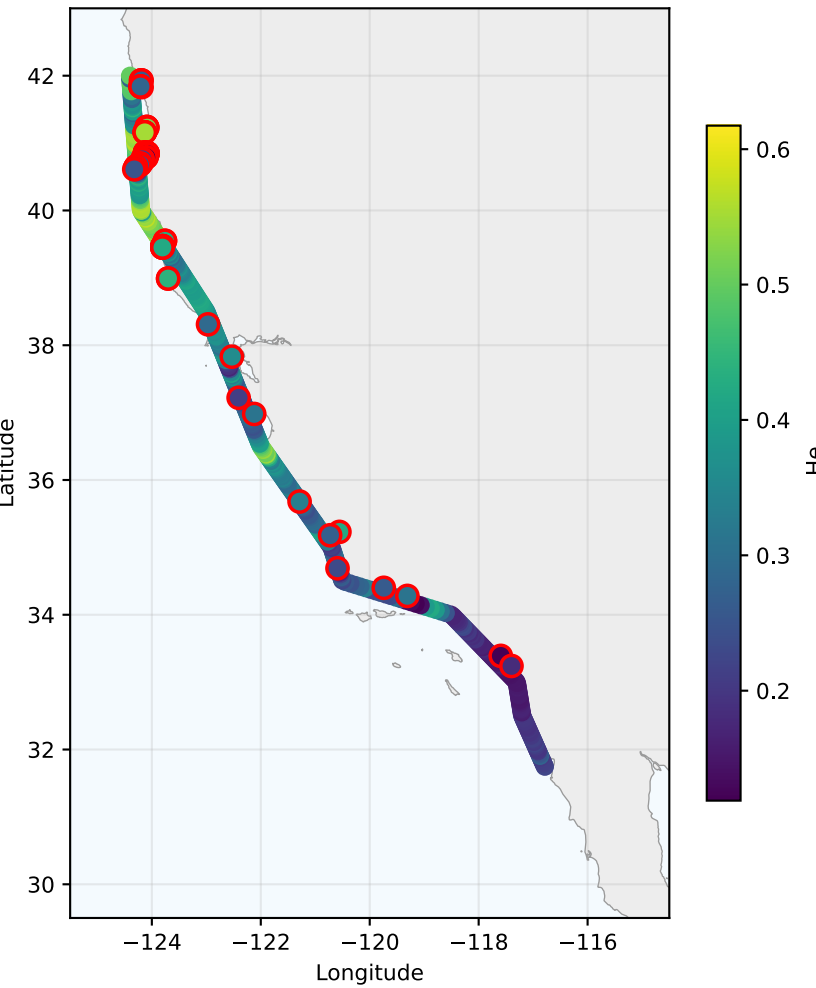

b) Species-level change — π

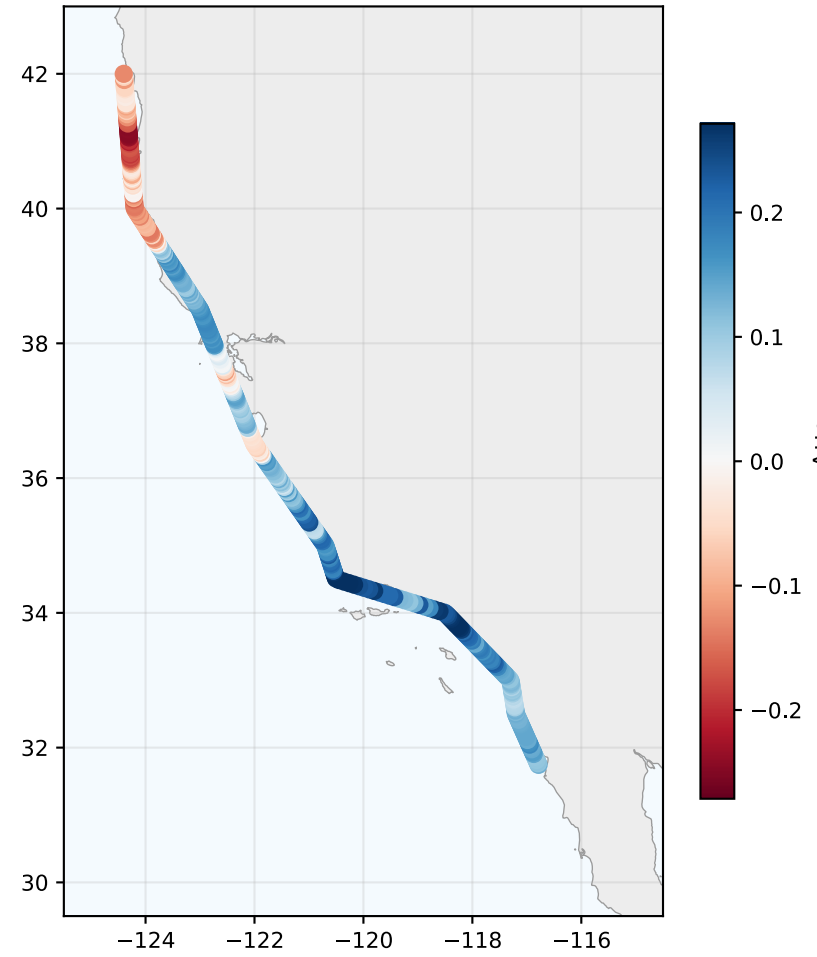

c) Community level — normalized diversity vs latitude

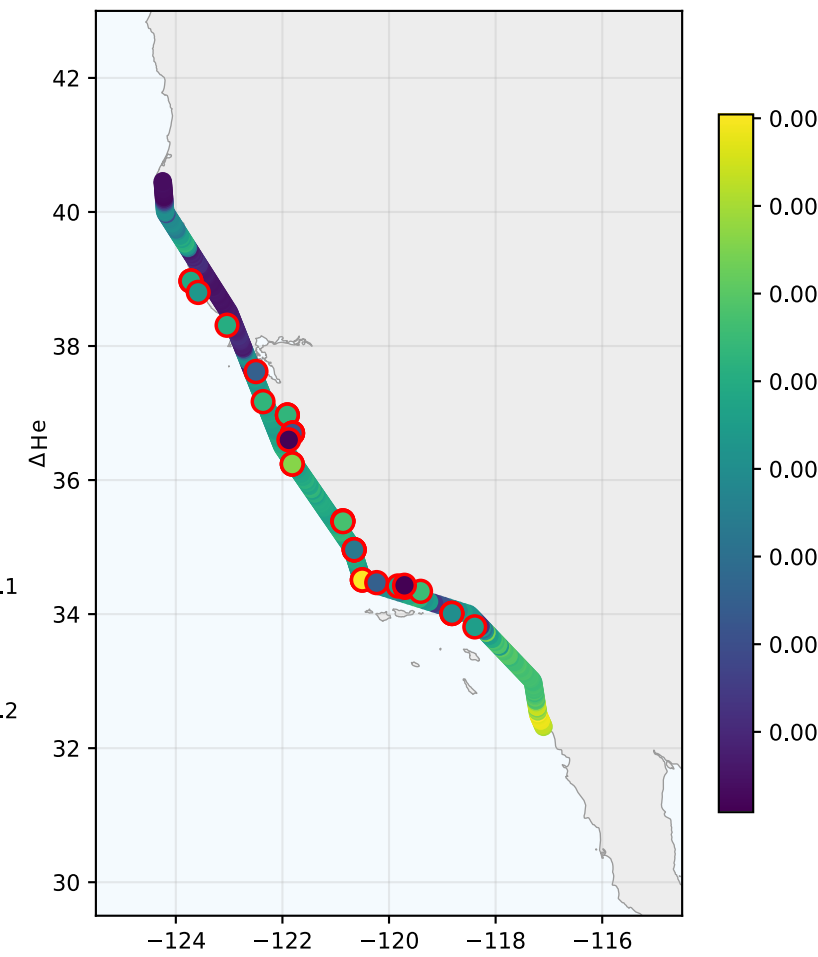

e) *Eucyclogobius newberryi*
Historical H_e

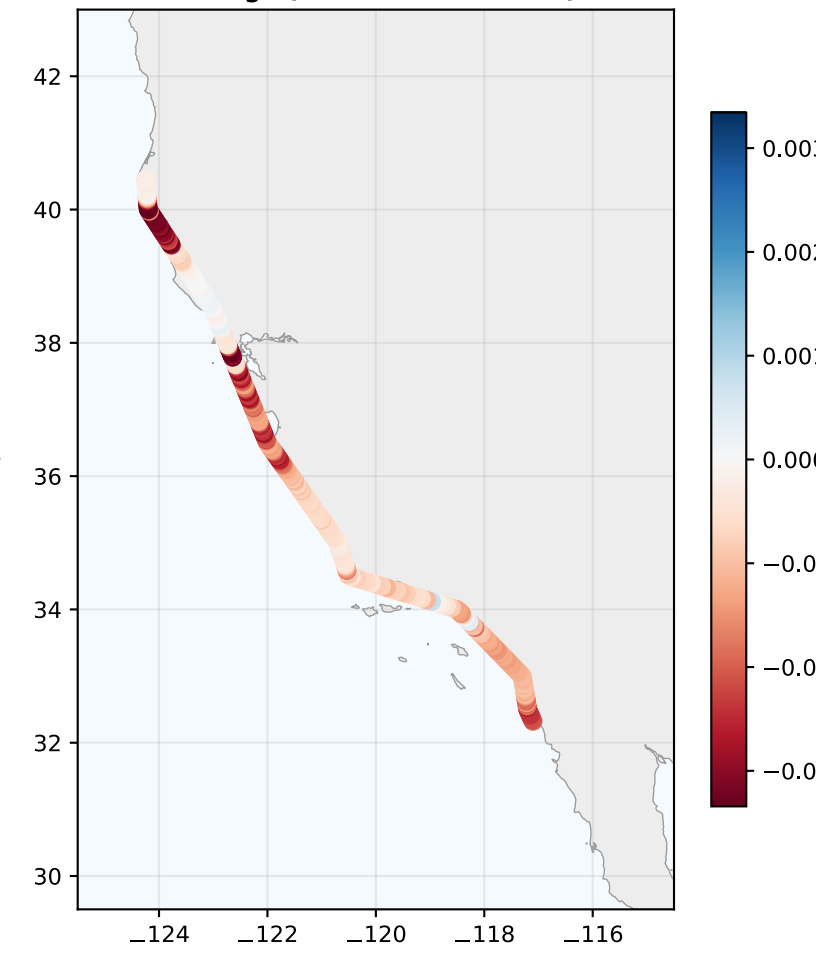

f) *Eucyclogobius newberryi*
Change (future — historical H_e)

g) *Emerita analoga*
Historical π

h) *Emerita analoga*
Change (future — historical π)

d) Projection uncertainty by latitude
(disagreement among the 5 GCMs)
